

Increasing energy efficiency through Public-Private Partnership projects in the BASREC-countries

Wzrost efektywności energetycznej poprzez inicjowanie partnerstw publiczno-prywatnych (PPP) w krajach BASREC

Baltic Sea Region Energy Cooperation – 1998

- Denmark, Estonia, Finland, Iceland, Lithuania, Latvia, Germany, Norway, Poland, Russia, Sweden and European Commission

PROJECT

exchange experience and good practices
in the field of public-private partnership
projects

encourage public and private
investors to cooperate in the PPP
formula on improving energy
efficiency

Objectives / Activities

The main tasks carried out within the project included:

- surveys aimed at identifying relevant PPP projects in the BASREC region
- the organization of three study visits to chosen BASREC countries
- the organization of a conference "Increasing energy efficiency through Public-Private Partnership (PPP) projects in the BASREC-countries"
- dissemination and promotion of the conference materials on the good practices.

Surveys and database

Colecting
information on
energy efficiency
projects in BASREC
countries in PPP
formule – ESCO/EPC

A database of over
100 identified
projects

Destination of study
visits

Study visits
