

Consolidating The Network

Baltic Carbon Forum on
Visions and Barriers 29-30 October 2015

Nils Rydberg
CCS Wirtschaftsberatung
Chair of Transport Task Force

This presentation will:

take stake on how to organize the CCS Expert Network

The Contents:

1. Note
2. Consolidation Rationale
3. Suggested Imperative Goals & Instruments
4. Showing The Face Of The Network With The Help Of A Project
5. How To Realize The Suggested

Note:

- a proposal presented in the form of a rough draft to provide an impression of what we are discussing
- should be subject to all the groups' input and word
- not TTF trying to do a coup

Consolidation Rationale

1. The Networks is an umbrella of three Task Forces and the Secretariat
2. The umbrella should show and take use of its combined capabilities
3. The network concept delivers trust in the eyes of funders
4. It is capable to deliver comprehensive project results

The funders' view:

1. Acceptance
2. Trustworthiness
3. Regional approach

The PROMO

Aim: Deployment of CCS

Mandate: Activity to Support Deployment

Regional awareness raising program & support to the Geological TF project

Knowledge sharing package consisting of “targeted facts”

- technical, political, legal, financial issues
- public acceptance
- climate change (IPCC presentation, CCS in cradle-to-grave –process
- lectures at the Nordic CCS Summer School
- build on the Bellona model?

Suggested Imperative Goals & Instruments

Storage Task Force:

- Goal: win funding
- Instrument: success

Network:

- Goal: find funding & a lead partner / host
- Instrument: four market & marketing factors

Showing The Face Of The Network With The Help Of A Project

Go public with the Network level project “PROMO”

- Introduces “CCS readiness” of not being purely a technical term but also a term of jurisdiction, governance and economics

The project of three components aim to facilitate:

- 1) initiation of ship transport opt-in mechanism,
- 2) initiation of authority co-operation between the Baltic Sea Region in early storage project permitting issues, and
- 3) initiation of processes which brush aside the stoppers

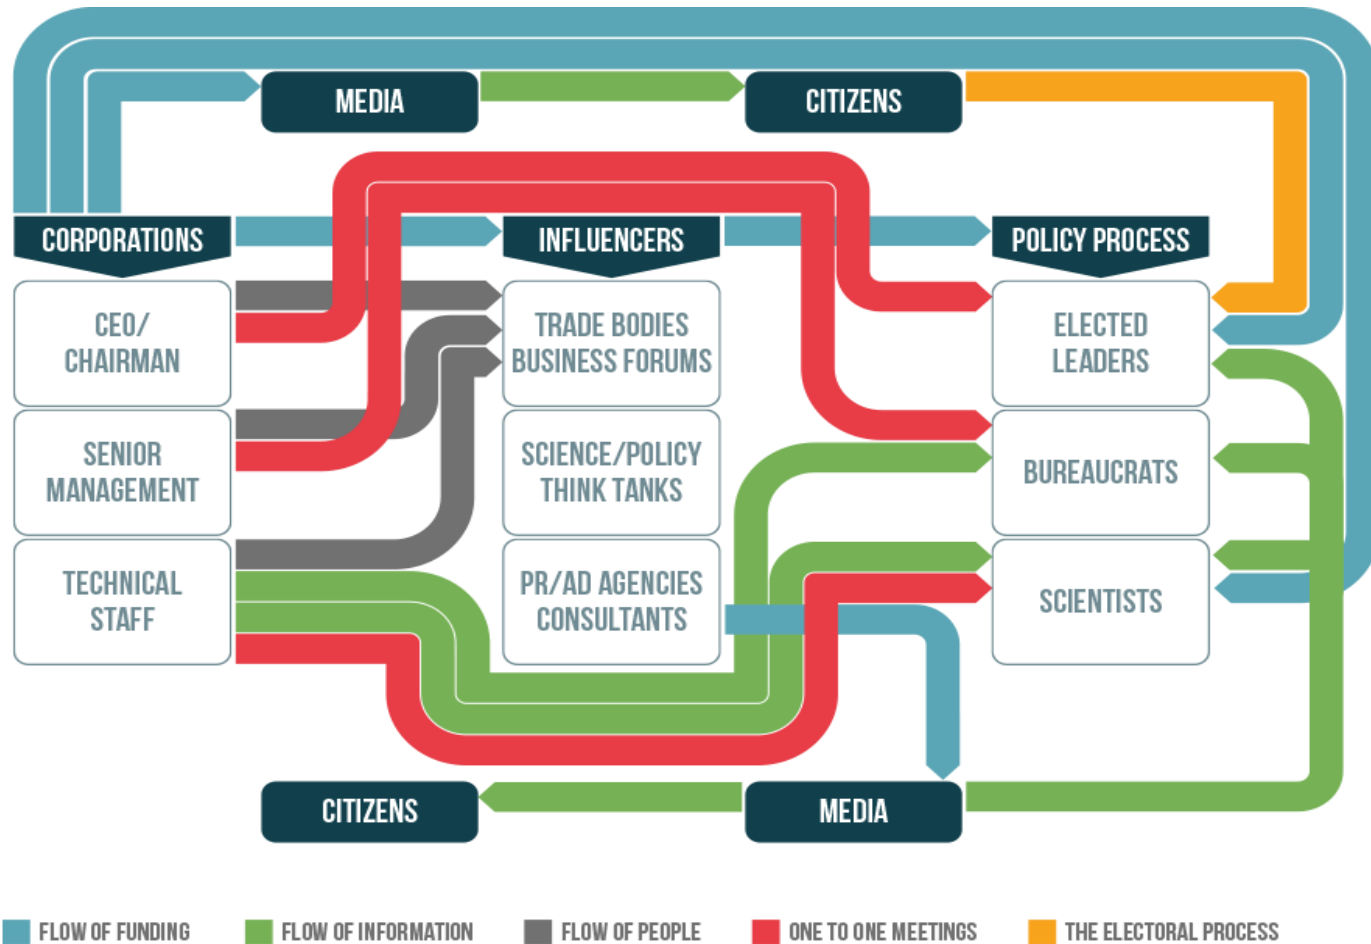

The PROMO

Instruments: workshops and webinars

Target groups:

1. ministries
2. finance warehouses:
 - insurance companies
 - institutional investors
 - investment funds
 - those who practice active ownership involvement
3. trade associations, industry
4. NGOs
5. labor unions

Corporate influence over the policy process

How To Realize The Suggested

1. Backdrop the Storage Task Forces main project application
2. Apply now funding for PROMO
3. Keep the Networks structure simple
4. Ideal to appoint on ad-hock basis suitable member(s) from each of the other Task Forces along with the Secretariat
5. Link to relevant organizations
6. Surviving the year 2016, internal communication should base on email and Skype

The Challenge

The opposition is already there!
